## ABOUT ME

I'm a hard-working and reliable individual, eager to take on new responsibilities and challenges. Varied experience led me to a point of wishing to settle and searching for a long-term stable position moving forward with my fiancé and future family. My greatest assets are my ability for quick learning, adaptability in face of new challenges and ability to work efficiently alone or in a larger team. The range of different positions I have taken and excelled at is a testament to my ability to deal with a variety of expectations and tasks. Since I started learning coding on my own I found deep interest and drive to keep learning and pursue a career in the industry.

## WORK EXPERIENCE
